Raster vs Vector Images

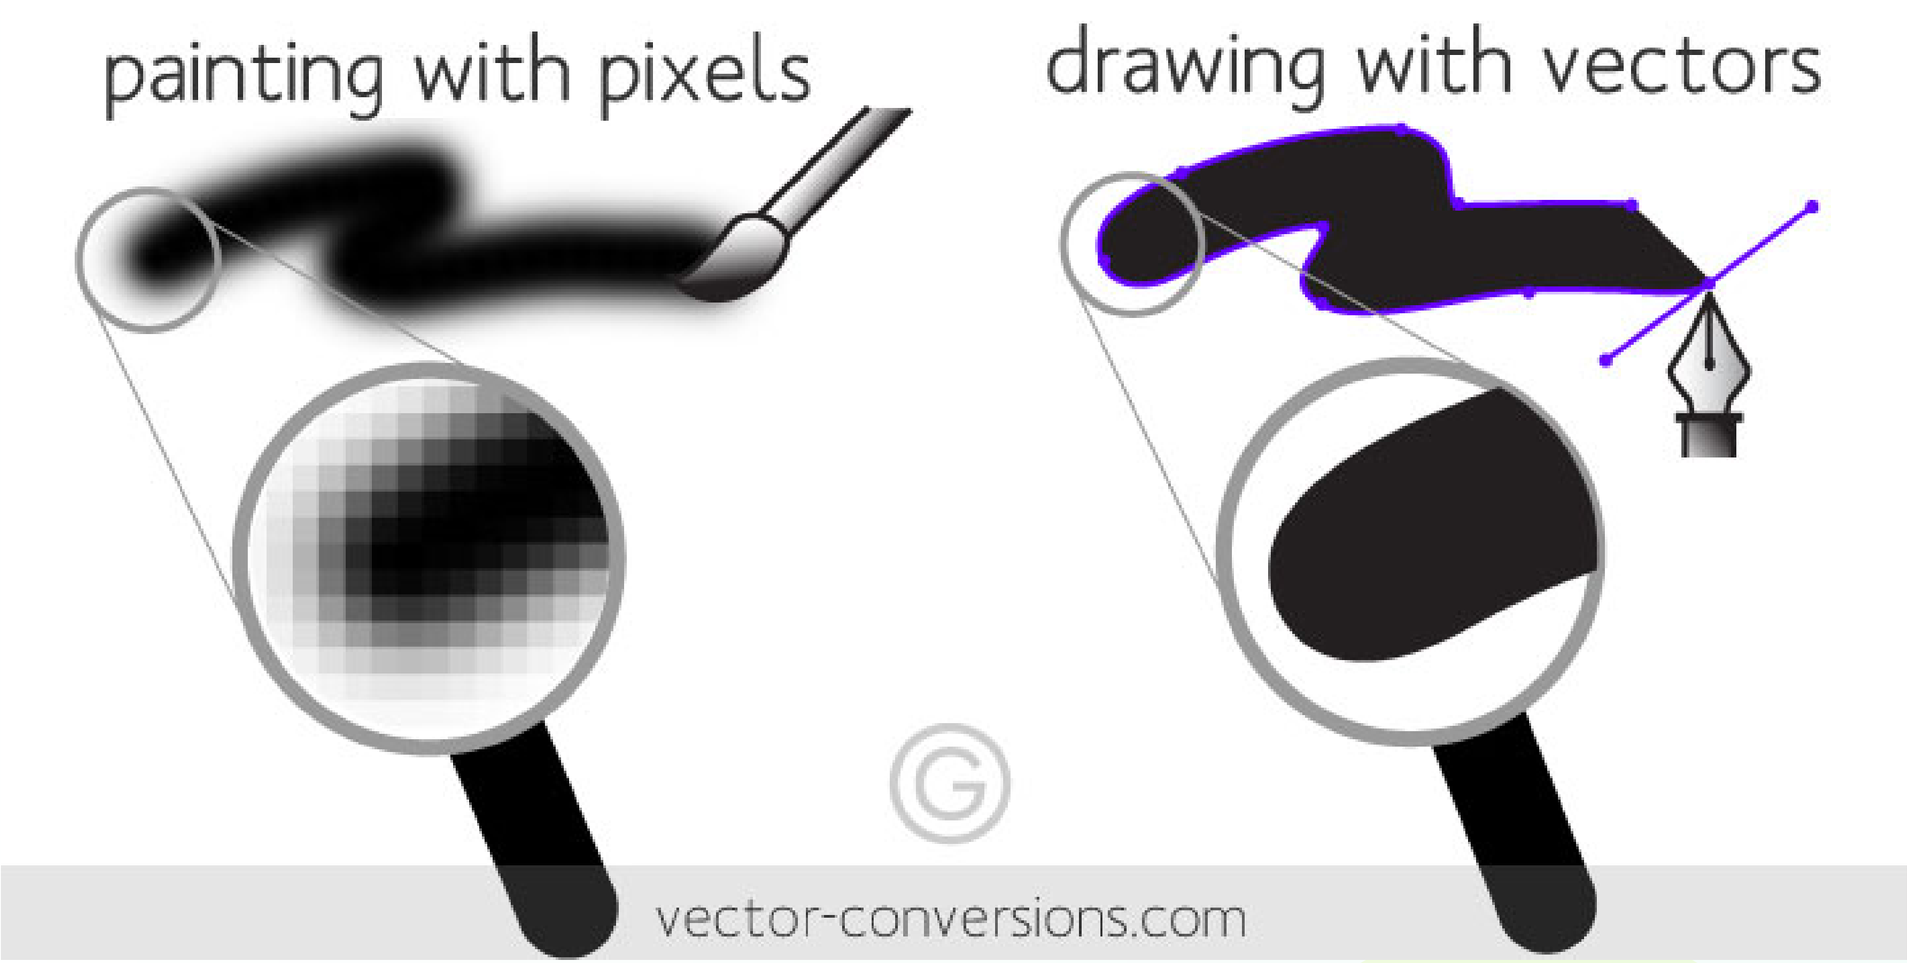

Image File Types

File Extension	Description
`.gif`	Graphics Interchange Format
`.png`	Portable Network Graphic
`.jpg` / `.jpeg`	Image format by Joint Photographic Experts Group
`.webp`	A superior image format of `.png` & `.jpg`
`.svg`	Scalable Vector Graphics

Image File Types

File Extension	Color Modes	Compression	Usage
`.gif`	Indexed Color	Loseless	Animated images
`.png`	Greyscale, True Color, Alpha	Loseless (better than .GIF)	Static Line art, iconic graphics where transparency matters.
`.jpg` / `.jpeg`	True Color	Lossy	Photographs, realistic images of people, venues etc.
`.webp`	Depends on compression	Loseless / Lossy	A superior image format of `.png` & `.jpg`
`.svg`	Anything that can be specified using CSS color syntax.	NA	UI that requires to be redrawn accurately at different sizes

How to get SVG

1. Create SVG from scratch
2. Generate SVG
3. Extract from websites

Create SVG with 3 basic elements

`<rectangle />`

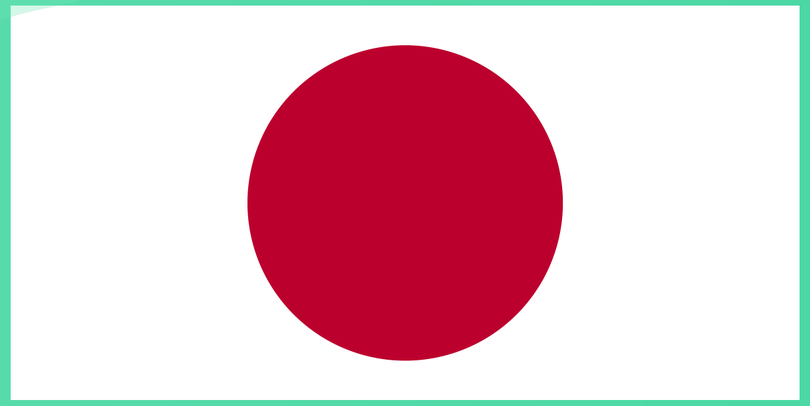
`<circle />`

`<polygon />`

Code Time! →

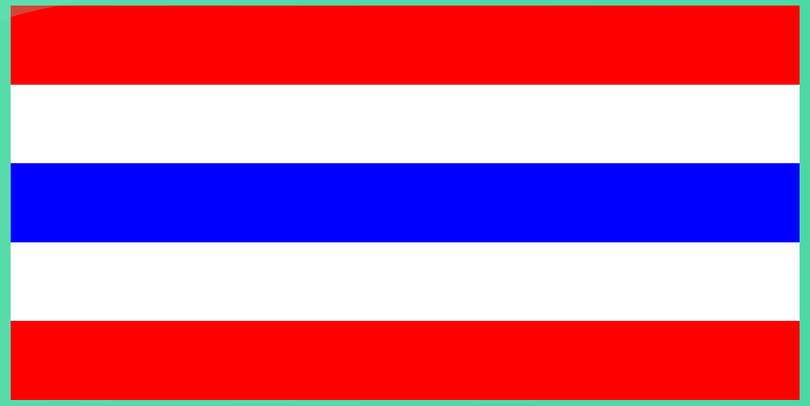
Create SVG with 3 simple shapes in code

JP flag in SVG



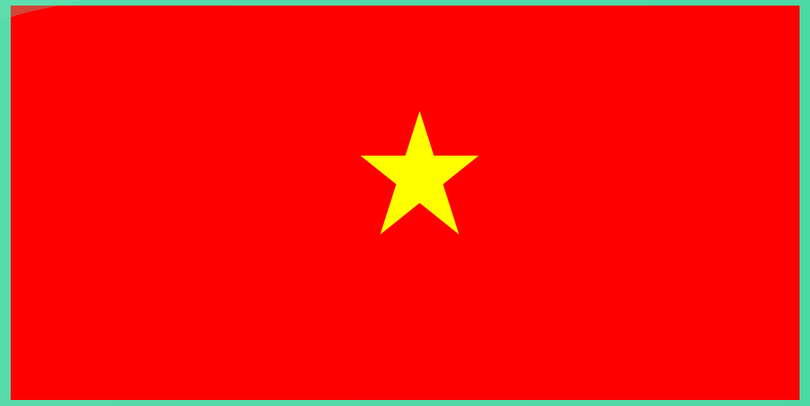
```svg
<svg>
    <rect width="100%" height="100%" fill="white" />
    <circle cx="50%" cy="50%" r=60 fill="#BC002D" />
</svg>
```

TH flag in SVG



```svg
<svg>
    <rect width="100%" height="20%" y="0" fill="red" />
    <rect width="100%" height="20%" y="20%" fill="white" />
    <rect width="100%" height="20%" y="40%" fill="blue" />
    <rect width="100%" height="20%" y="60%" fill="white" />
    <rect width="100%" height="20%" y="80%" fill="red" />
</svg>
```

VN flag in SVG

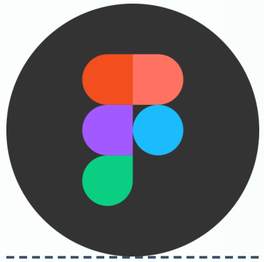


```svg
<svg>
  <defs>
    <polygon id="star" fill="yellow"
      points="100,10 40,198 190,78 10,78 160,198" />
  </defs>
  <rect width="100%" height="100%" fill="red" />
  <svg viewBox="78 0 600 600" x="25%" y="25%">
    <use href="#star">
    </use>
  </svg>
</svg>
```

SG flag in SVG

```svg
<svg>
  <rect width="100%" height="50%" fill="red" />
  <rect width="100%" height="50%" y="50%" fill="white" />
  <circle cx='15%' cy='25%' r='30' fill='white' />
  <circle cx='20%' cy='25%' r='30' fill='red' />
  <svg viewBox="600 -100 1000 1800">
    <use href="#white-star" />
    <use href="#white-star" x="-20%" y="10%" />
    <use href="#white-star" x="20%" y="10%" />
    <use href="#white-star" x="-12.5%" y="22%" />
    <use href="#white-star" x="12.5%" y="22%" />
  </svg>
</svg>
```

Create SVG with Design Tools

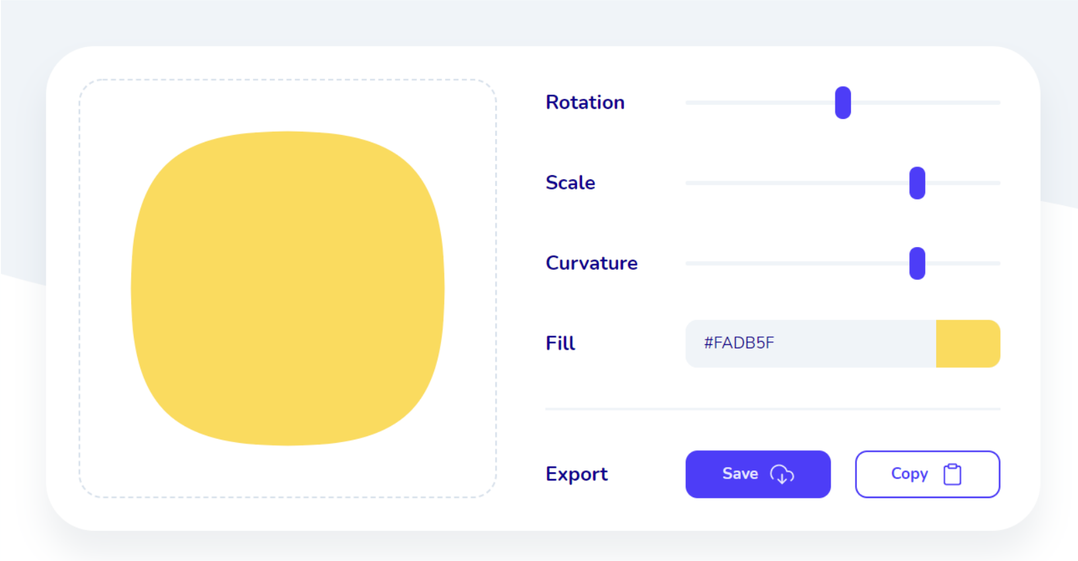


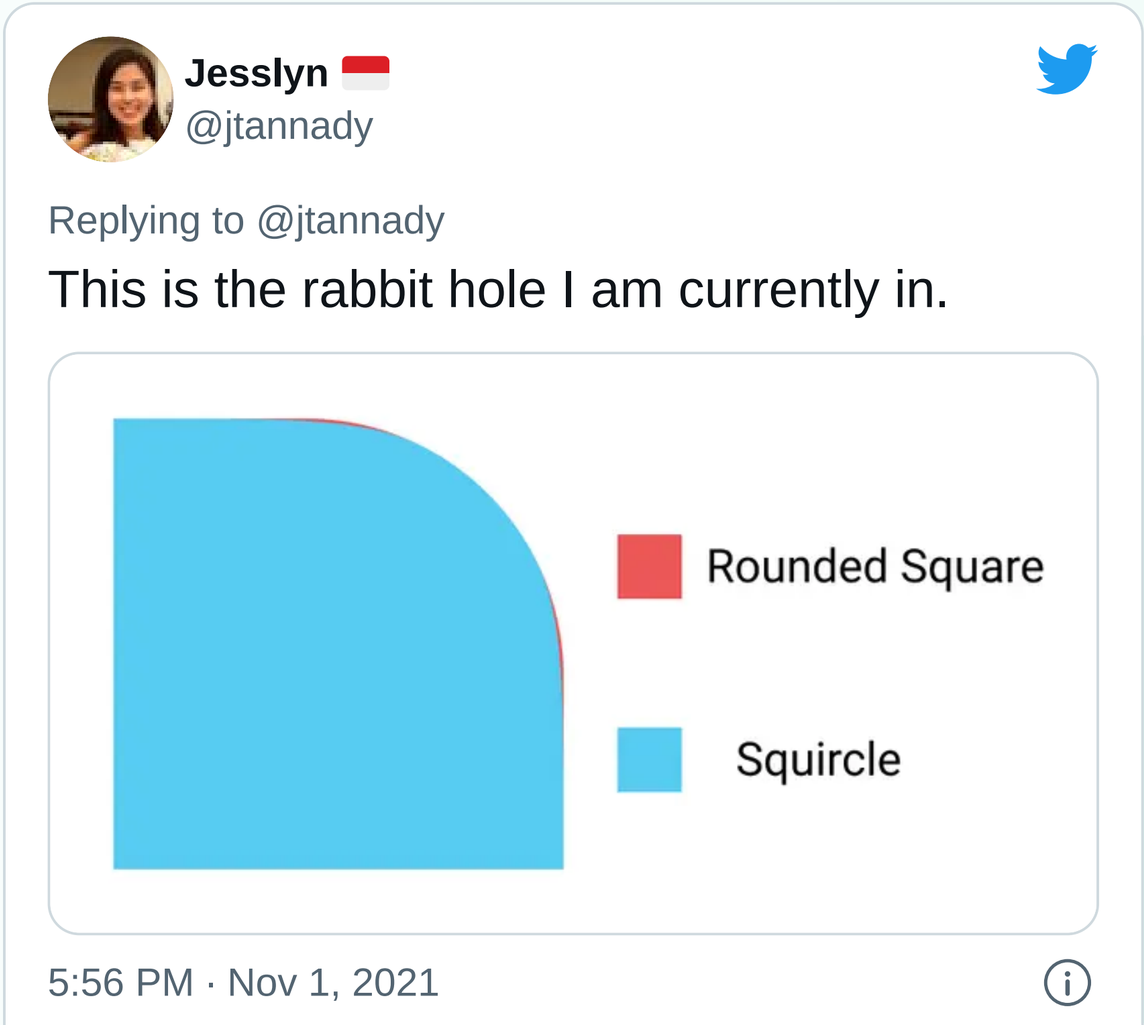
Figma Demo

Ellipse, Polygon, Paths, Bezier Curves

Generate SVG

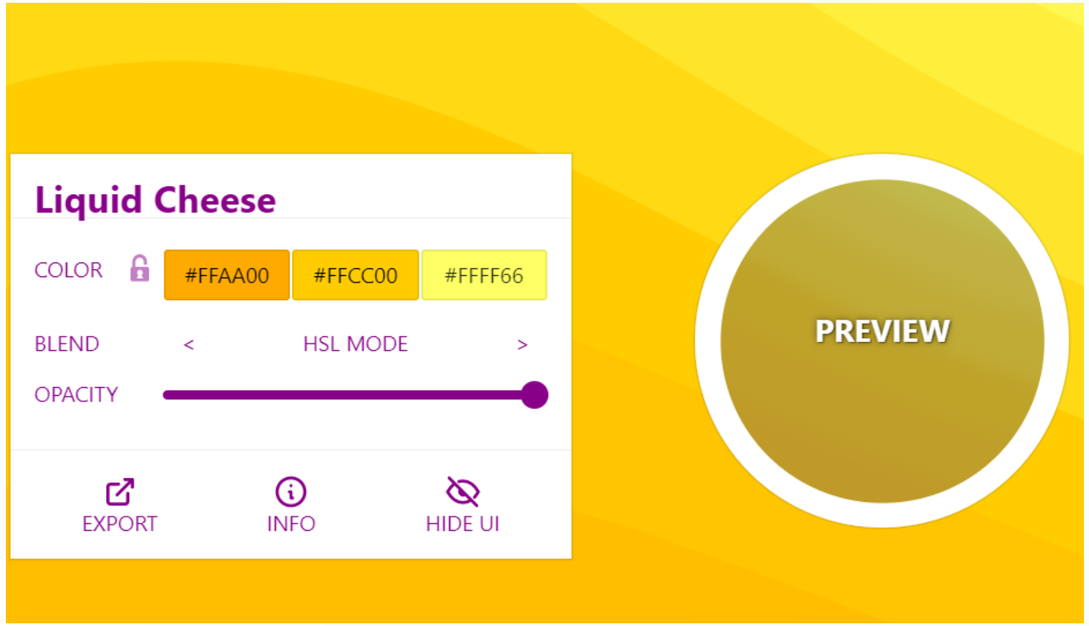
1. Squicley for generating Squircles





Generate SVG

2. SVGBackgrounds.com for generating backgrounds



Extract from websites

SVGOMG Demo with Hacktoberfest’s SVG
