

Intro to SVG

Let's start →

Estee Tey

- 🖥️ Grad Software Developer at Thoughtworks
- ✎️ Writes about Web Dev, UI, Dev growth
- 🎨 Experienced in creating mockups & graphics

🐙 [lyqht](#) 🐦 [estee_tey](#)

Expectations

No Prerequisites

`expect(target_audience).toBeAny()`

Learn something

`expect().toIncrease();`

Your time to be worth it

`expect( ).toYield()`

Have fun thinking

`expect().andThen()`

Raster vs Vector Images

painting with pixels

drawing with vectors

vector-conversions.com

Image File Types

File Extension	Description
.gif	Graphics Interchange Format
.png	Portable Network Graphic
.jpg / .jpeg	Image format by Joint Photographic Experts Group
.webp	A superior image format of .png & .jpg
.svg	Scalable Vector Graphics

Image File Types

File Extension	Color Modes	Compression	Usage
.gif	Indexed Color	Loseless	Animated images
.png	Greyscale, True Color, Alpha	Loseless (better than .GIF)	Static Line art, iconic graphics where transparency matters.
.jpg / .jpeg	True Color	Lossy	Photographs, realistic images of people, venues etc.
.webp	Depends on compression	Loseless / Lossy	A superior image format of .png & .jpg
.svg	Anything that can be specified using CSS color syntax.	NA	UI that requires to be redrawn accurately at different sizes

How to get SVG

1. Create SVG from scratch
2. Generate SVG
3. Extract from websites

Create SVG with 3 basic elements

```
<rectangle />
```

```
<circle />
```

```
<polygon />
```

Code Time! →

Create SVG with 3 simple shapes in code

JP flag in SVG

```
1  <svg>
2    <rect width="100%" height="100%" fill="white" />
3    <circle cx="50%" cy="50%" r=60 fill="#BC002D" />
4  </svg>
```

TH flag in SVG

```
1  <svg>
2    <rect width="100%" height="20%" y="0" fill="red" />
3    <rect width="100%" height="20%" y="20%" fill="white" />
4    <rect width="100%" height="20%" y="40%" fill="blue" />
5    <rect width="100%" height="20%" y="60%" fill="white" />
6    <rect width="100%" height="20%" y="80%" fill="red" />
7  </svg>
```

VN flag in SVG

```
1  <svg>
2    <defs>
3      <polygon id="star" fill="yellow"
4        points="100,10 40,198 190,78 10,78 160,198" />
5    </defs>
6    <rect width="100%" height="100%" fill="red" />
7    <svg viewBox="100 0 600 600" x="25%" y="25%">
8      <use href="#star">
9    </use>
10  </svg>
11 </svg>
```

SG flag in SVG

```
1  <svg>
2    <rect width="100%" height="50%" fill="red" />
3    <rect width="100%" height="50%" y="50%" fill="white" />
4    <circle cx='15%' cy='25%' r='30' fill='white' />
5    <circle cx='20%' cy='25%' r='30' fill='red' />
6    <svg viewBox="600 -100 1000 1800">
7      <use href="#white-star" />
8      <use href="#white-star" x="-20%" y="10%" />
9      <use href="#white-star" x="20%" y="10%" />
10     <use href="#white-star" x="-12.5%" y="22%" />
11     <use href="#white-star" x="12.5%" y="22%" />
12   </svg>
13 </svg>
```

Create SVG with Design Tools

Figma Demo

Ellipse, Polygon, Paths, Bezier Curves

Setting SVG File as an image source

```
1 
```

Setting SVG File as an image source

```
1 
```

```
1 .special-image {
2   height:240px;
3   animation:spin 4s linear infinite;
4 }
5
6 @keyframes spin {
7   100% {
8     transform:rotate(360deg);
9   }
10 }
```

Generate SVG

1. Squicley for generating Squircles

Generate SVG

2. [SVGBackgrounds.com](https://svgbackgrounds.com) for generating backgrounds

Extract from websites

Demo with Hacktoberfest's SVG

⌈ P.S. If you use any extracted images for your own websites or apps, please remember to give **attribution**.

Bonus: Optimization of SVG

SVGOMG
