What is SVG?

Images

painting with pixels

drawing with vectors

vector-conversions.com

Image File Types

File Extension	Description
.gif	Graphics Interchange Format
.png	Portable Network Graphic
.jpg / .jpeg	Image format by Joint Photographic Experts Group
.webp	A superior image format of .png & .jpg
.svg	Scalable Vector Graphics

Image File Types

File Extension	Color Modes	Compression	Usage
.gif	Indexed Color	Loseless	Animated images
.png	Greyscale, True Color, Alpha	Loseless (better than .GIF)	Static Line art, iconic graphics where transparency matters.
.jpg / .jpeg	True Color	Lossy	Photographs, realistic images of people, venues etc.
.webp	Depends on compression	Loseless / Lossy	A superior image format of .png & .jpg
.svg	Anything that can be specified using CSS color syntax.	NA	UI that requires to be redrawn accurately at different sizes

How to get SVG

1. Create SVG from scratch
2. Generate SVG
3. Extract from websites

Create SVG with 3 basic elements

```
<rectangle />
```

```
<circle />
```

```
<polygon />
```

Code Time! →

Create SVG with 3 simple shapes in code

JP flag in SVG

```
1  <svg>
2    <rect width="100%" height="100%" y="0" fill="white" />
3    <circle cx="50%" cy="50%" r=60 fill="#BC002D" />
4  </svg>
```

TH flag in SVG

```
1  <svg>
2    <rect width="100%" height="20%" y="0" fill="red" />
3    <rect width="100%" height="20%" y="20%" fill="white" />
4    <rect width="100%" height="20%" y="40%" fill="blue" />
5    <rect width="100%" height="20%" y="60%" fill="white" />
6    <rect width="100%" height="20%" y="80%" fill="red" />
7  </svg>
```

VN flag in SVG

```
1  <svg>
2    <defs>
3      <polygon id="star" fill="yellow"
4        points="100,10 40,198 190,78 10,78 160,198" />
5    </defs>
6    <rect width="100%" height="100%" fill="red" />
7    <svg viewBox="78 0 600 600" x="25%" y="25%">
8      <use href="#star">
9      </use>
10   </svg>
11 </svg>
```

SG flag in SVG

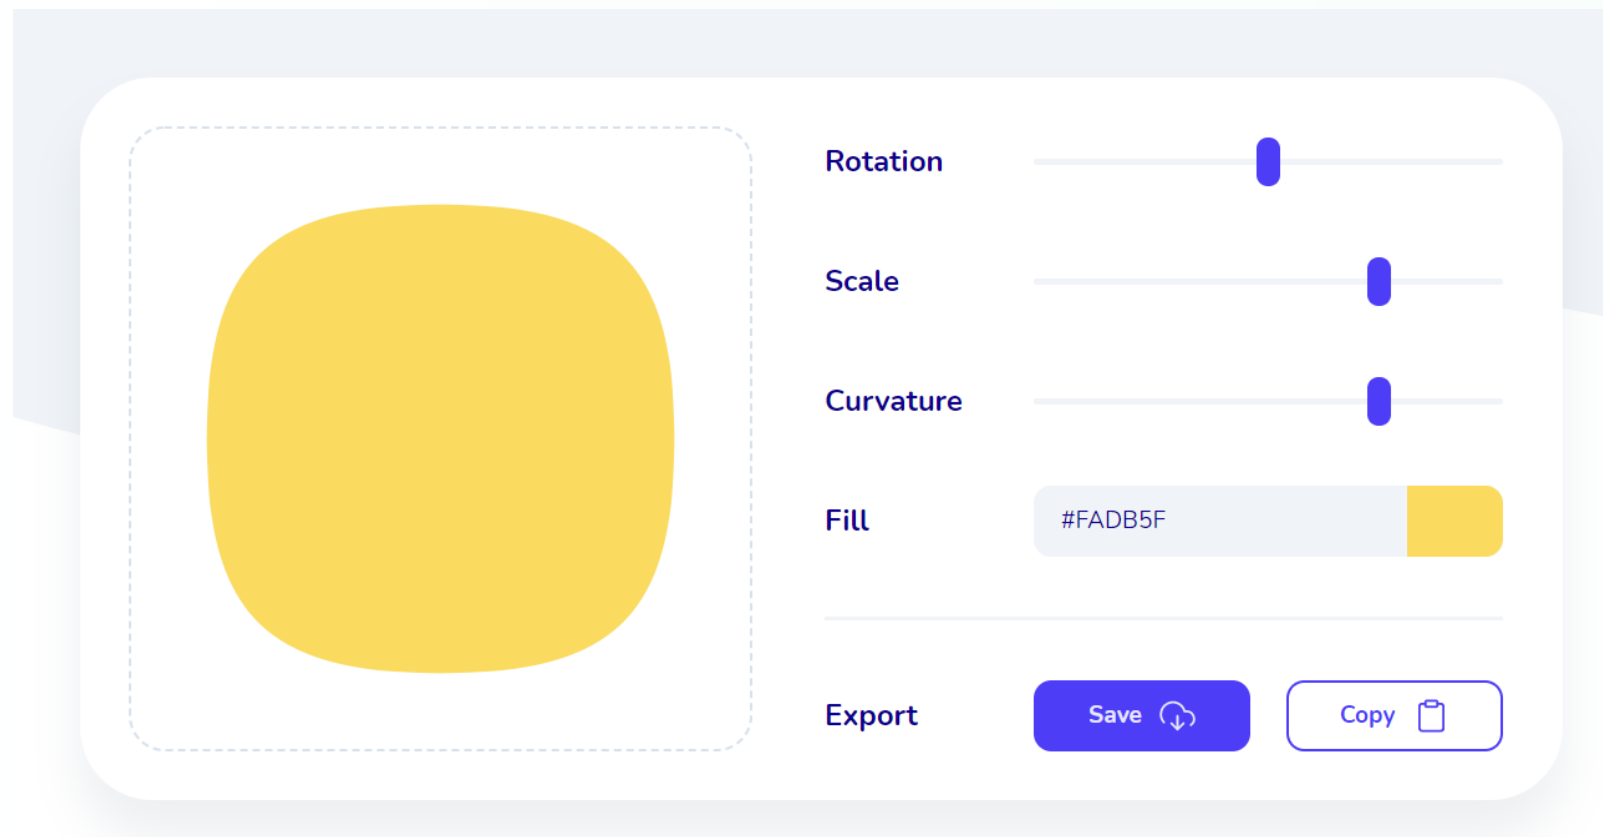

```
1  <svg>
2    <rect width="100%" height="50%" fill="red" />
3    <rect width="100%" height="50%" y="50%" fill="white" />
4    <circle cx='15%' cy='25%' r='30' fill='white' />
5    <circle cx='20%' cy='25%' r='30' fill='red' />
6    <svg viewBox="600 -100 1000 1800">
7      <use href="#white-star" />
8      <use href="#white-star" x="-20%" y="10%" />
9      <use href="#white-star" x="20%" y="10%" />
10     <use href="#white-star" x="-12.5%" y="22%" />
11     <use href="#white-star" x="12.5%" y="22%" />
12   </svg>
13 </svg>
```

Create SVG with Design Tools

Generate SVG

1. Squicley for generating Squircles

Jesslyn 
@jtannady

Replying to @jtannady

This is the rabbit hole I am currently in.

Rounded Square

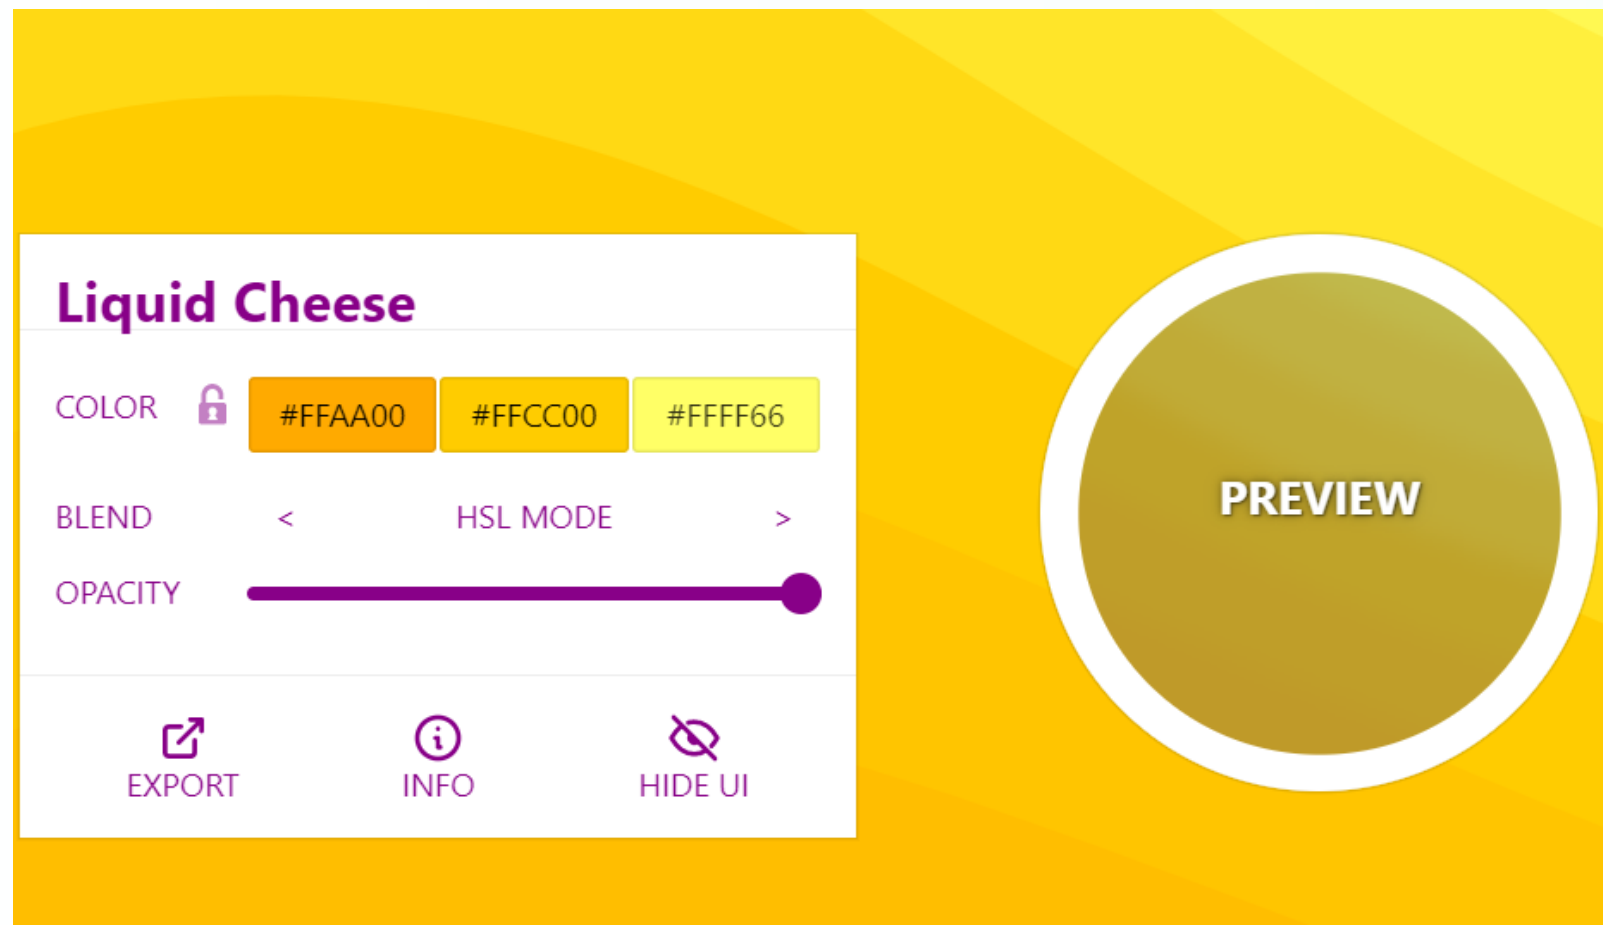

Squircle

5:56 PM · Nov 1, 2021

Generate SVG

2. SVGBackgrounds.com for generating backgrounds

Say goodbye to blurry, pixelated pattern backgrounds 🤔

SVGBackgrounds by [@MattVisiwig](#) is a great tool for both no-coders & devs to easily create backgrounds that look good ✨ no matter its size.

Here are the features at a glance 📝

[#design](#) [#css](#) [#svg](#)
[#DEVCommunity](#) [#NoCode](#)
